<b>Name:</b> <b>KITTY</b>	

### Additional Information

If disease test results indicate an affected or at risk animal, we recommend that you contact your veterinarian for information on disease progression and management.

For more detailed information on Ragdoll HCM test results, please visit our website at:  
[www.vgl.ucdavis.edu/services/cat/HCM.php](http://www.vgl.ucdavis.edu/services/cat/HCM.php)

Note: This test only detects the R820W mutation associated with HCM in Ragdoll cats and outcrosses as described by Meurs et al. 2007

For terms and conditions of testing, please see [vgl.ucdavis.edu/about/terms-and-conditions](http://vgl.ucdavis.edu/about/terms-and-conditions)

Results are determined using PCR-based methods. The results relate only to the sample tested as identified by the submitter (for example, identity and/or breed).
